MBS-PRO
All-in-1 Pro Sensor (Temp/Humid/CO2/Light)

The MBS-PRO 4-in-1 sensor combines a precision air temperature, humidity, CO2 and photocell sensor to create the perfect 4-in-one environmental sensor. It is designed for Hydro-X Pro and Hydro-X Plus.

Assembled using a water-resistant plastic injection enclosure and "push-lock" connection to make installation easy. The MBS-PRO can be placed in multiple locations throughout the growing area to provide spot measurements from multiple sensors. (Up to 50 sensors can be connected to the Hydro-X Pro)

The sensors can then be used together (averaged) or separately in order to control a specific section of the grow area by assigning a sensor to a specific control device.

The MBS-PRO built-in LCD display also functions as an on-site sensor display monitor.

*Note: The MBS-Pro requires the SPH-1 for supplemental power.

*Note: Sensors should remain dry and clean to prevent premature failure. Do not spray foreign substances or allow water / condensate on the sensors.
